

S#	Query	Response
1	Should Key staff (International Experience) be a foreign national? Can a Pakistani national with such experience be considered for these positions.	A Citizen of Pakistan (National) may be considered for an International key expert position if the firm demonstrates that the person has exceptional international experience required as per the TORs.
2	There is no prescribed format available with TORs for preparation of EOI Documents. Could you please provide some specified format so that a uniform document can be prepared by Interested Consultants which is easy to evaluate?	Please note that at REOI stage there is an 'assessment' of REOI' in accordance with Subsection of 5.50 of Section V. Evaluation criteria and methodology shall be specified in detail in the request for proposals document". At REOI stage no document is issued no there is no requirement of responses to be submitted on a prescribed document. Please review the REOI and ToR to submit most relevant information which may enhance your chances of being shortlisted.
3	There is a confusion between international experts and international experience. Annex 1: Terms of Reference, page # 11, Sub Section 9.1 states that the estimated person-months inputs are 60 months of international experts for the assignment whereas, on the same page in the table it is mentioned as List of Key Staff (International Experience). In this regard, please clarify whether international experts are required or national experts with international experience will meet the requirement.	A Citizen of Pakistan (National) may be considered for an International key expert position if the firm demonstrates that the person has exceptional international experience required as per the TORs.
4	Annex 1: Terms of Reference, page # 11, Sub Section 9.1 states that the estimated person-month inputs are 60 months of international experts for the assignment. However, keeping in view the project duration, these 60 months do not commensurate to the 08 Key Staff with international experience out of which at least 03 positions (i.e... Team Leader, Chief Resident Engineer and Procurement and Contract Management Specialist) are assumed to be full time staff. Please clarify, whether these 60 months are final or there is any option of revision of inputs.	The specific details of person months would be stated in RFP and at REOI stage any information on actual details of person months is irrelevant and has no bearing on preparing a responsive EOI.
5	Could you please confirm our anticipation that an international (not a national one from Pakistan) company, providing international CVs of international experts, is awaited to be part of a bidding Consortium?	It is all left to the business/bidding strategy of the consulting firm to form or not to form a JV / consortium with other firms. A Citizen of Pakistan (National) may be considered for an International key expert position if the firm demonstrates that the person has exceptional international experience required as per the TORs.
